1. Welcome to AgroCart

AgroCart is an online marketplace that connects farmers directly with the people who buy their food, whether that's a household doing the weekly shop, a restaurant sourcing fresh produce, or a school district feeding thousands of students every day. The platform is owned and operated by AgroChain Cart, LLC, and it's built around one simple idea: cut out the middlemen so farmers keep more of every dollar spent, and buyers get fresher food with full visibility into where it came from.

This manual walks you through every corner of the app in plain language. Whether you're here to buy a bag of heirloom tomatoes, list your farm's harvest for sale, or set up a recurring contract for your school cafeteria, you'll find clear, numbered steps for each task.

1.1 Who This Manual Is For

AgroCart serves three main types of users, and the app adapts to whichever role you're in:

- **Everyday buyers** — anyone shopping for fresh produce, dairy, honey, or other farm goods through the main marketplace.
- **Farmers and producers** — growers who want to list their products for sale and tap into USDA grant programs through the Farmer Hub.
- **Institutional buyers** — schools, hospitals, universities, food banks, and corporate cafeterias placing larger bulk orders through the Institutional / LFPP section.

You don't need to pick a single role and stick with it. The same account can browse the marketplace as a buyer one minute and switch to the Farmer Hub the next, since every section lives in the same sidebar menu.

1.2 Getting to the App

AgroCart runs in your web browser, so there's nothing to download or install. Simply open your browser and go to:

www.agrichaincart.com/marketplace/agrichain-app/

The app works on desktop computers, tablets, and phones. On a phone or narrow screen, the left-hand sidebar menu is replaced with a row of icons fixed to the bottom of the screen, so every feature described in this manual is still just a tap away.

1.3 Finding Your Way Around

Once the app loads, you'll see two main areas:

- **The sidebar (left side of the screen)** — this is your main menu. It's grouped into three sections: Marketplace (for buying), Producer (for farmers and institutions), and Intelligence (for data, logistics, and the AI assistant). Your shopping cart also lives at the bottom of the sidebar, so you can see what you're about to buy no matter which page you're on.
- **The main panel (centre of the screen)** — this is where the content for whichever menu item you've selected appears, whether that's the product grid, your order history, or the analytics dashboard.

At the top right of the sidebar you'll also find a Light Mode / Dark Mode toggle. Tap it any time to switch between a bright, paper-like theme and a darker theme that's easier on the eyes in low light. This is purely a visual preference and doesn't affect anything else in the app.

2. Browsing and Shopping the Marketplace

The Marketplace is the heart of AgroCart and the first thing you see when you open the app. This is where every product listed by every farmer on the platform shows up, ready to add to your basket.

2.1 Opening the Marketplace

Click Browse Produce near the top of the sidebar, under the Marketplace heading. If you've just opened the app, you're already here by default.

2.2 Reading the Product Cards

Each product appears as its own card with a photo and a few key details, so you can tell at a glance what you're looking at:

- **Product name and photo**, so you know exactly what you're buying.
- **A green Organic tag** in the top corner of the photo, shown only on products that are certified organic.
- **Farm name and region** (for example, Golden State Farms in California), so you can see exactly where your food is coming from.
- **A star rating and review count**, based on feedback from past buyers.
- **Price per unit** (per pound, per dozen, per jar, and so on) and how many units are left in stock.
- **A heart icon** in the top right corner of the photo, used to save the item to your wishlist.

Hover your mouse over a product card (or tap it on a touchscreen) and a Quick View button appears over the photo. This opens a closer look at the product without leaving the marketplace page.

2.3 Searching for a Specific Product

If you know what you're after, use the search bar in the top right corner of the Marketplace page. Type a product name or farm name (for example, "kale" or "Hudson Fresh") and the product grid updates as you type, showing only matching results.

2.4 Filtering by Region or Organic Status

Underneath the welcome banner you'll find a row of filter chips. These let you narrow down the product grid without typing anything:

To filter by region:

1. Look for the row of small buttons labelled All, CA, NY, TX, FL, and WA.
2. Click the state abbreviation you want. The button will highlight to show it's active.
3. The product grid instantly updates to show only items grown in that region.
4. Click All at any time to clear the region filter and see everything again.

To show only certified organic products:

1. Click the  Organic Only chip at the end of the filter row.

2. The grid will refresh to show just organic listings.
3. Click the same chip again to turn the filter off.

Region and organic filters can be combined. For example, you can filter to organic products from Washington State at the same time.

2.5 Sorting the Results

On the right-hand side of the filter row is a Sort by dropdown menu. Use it to reorder the product grid:

- **Price: Low → High** — cheapest items first.
- **Price: High → Low** — most expensive items first.
- **Top Rated** — highest star ratings first.

2.6 Viewing Product Details (Quick View)

To see more information about a single product before adding it to your cart:

1. Hover or tap on the product's photo so the Quick View button appears.
2. Click Quick View.
3. A detail window opens showing a larger photo, the full price, how many units are in stock, whether the item is organic, and the number of verified reviews.
4. From here you can click Add to Cart to buy it right away, tap the heart icon to save it to your wishlist, or click Close to return to browsing.

2.7 Adding Items to Your Cart

There are two quick ways to add a product to your cart while browsing:

- Click the Add button directly on the product card.
- Open Quick View (as described above) and click Add to Cart from there.

Each time you add an item, a small confirmation message briefly appears at the bottom of the screen letting you know it was added. Your cart total and item count, shown in the sidebar, update immediately.

Tip: If you click Add to Cart on a product you've already added, AgroCart simply increases the quantity by one rather than creating a duplicate entry, as long as there's enough stock left.

2.8 Comparing Products Side by Side

If you're trying to decide between two or three similar products, such as different farms' tomatoes, AgroCart's comparison tool lays out the details in a single table.

1. On each product card, tick the small Compare checkbox underneath the Add button.
2. Repeat for every product you'd like to compare (at least two are needed).
3. A Compare bar appears, usually fixed to the bottom of the screen, showing how many items you've selected.

4. Click Compare Now on that bar.
5. A table opens showing each product's photo, price, farm, region, organic status, rating, and remaining stock side by side, so you can weigh them against each other at a glance.
6. Click Close when you're done.

3. Saving Items to Your Wishlist

If you spot something you like but aren't ready to buy yet, save it for later instead of losing track of it.

3.1 Saving a Product

Click the heart icon in the top right corner of any product photo, either on the main marketplace grid or inside Quick View. The heart turns solid pink to confirm the item has been saved, and the wishlist counter in the sidebar updates.

3.2 Viewing Your Wishlist

Click Wishlist in the sidebar, just below Browse Produce. Every item you've saved appears here as its own card with the photo, name, farm, and price.

If you haven't saved anything yet, this page will simply show a friendly reminder to browse the marketplace and start tapping the heart icon on products you like.

3.3 Moving a Wishlist Item to Your Cart

From the Wishlist page, click Add to Cart on any saved item to move it straight into your basket without having to search for it again in the marketplace.

3.4 Removing an Item from Your Wishlist

Click the solid pink heart icon again, either from the Wishlist page or from the marketplace grid, to unsave the item. It will disappear from your wishlist immediately.

4. Your Cart and Checking Out

4.1 Where to Find Your Cart

Unlike the other sections of AgroCart, your cart doesn't have its own full page. Instead, it lives permanently at the bottom of the sidebar so it's always visible while you shop, labelled Cart with a running count of items inside.

On a phone or narrow screen, look for the basket icon in the bottom navigation bar instead.

4.2 Reviewing What's in Your Cart

The sidebar cart panel lists every item you've added, along with the quantity of each. Underneath the list, a running Total shows what you'll pay before you even open the checkout window.

4.3 Adjusting Quantities

Next to each item in the cart panel you'll see a minus button and a plus button.

- Click the plus button to add one more of that item.
- Click the minus button to remove one. If the quantity reaches zero, the item is automatically removed from your cart.
- Click the small × button beside an item to remove it from the cart immediately, regardless of quantity.

4.4 Starting Checkout

When you're ready to pay, click Secure Checkout at the bottom of the sidebar cart panel (or the cart icon in the bottom navigation bar on mobile).

Note: If your cart is empty, AgroCart will let you know there's nothing to check out yet rather than opening an empty payment window.

4.5 Completing Your Order

The checkout window summarises every item in your order alongside its line total, followed by the grand Total. To finish placing your order:

1. Enter your full name in the Full name field.
2. Enter your email address in the Email address field.
3. Double-check the order summary and total shown above the form.
4. Click Place Order to confirm.

Once your order is placed, AgroCart shows a confirmation message, your cart empties out, and the order is immediately added to your order history (covered in the next section). Behind the scenes, the relevant farms are notified so they can start preparing your produce.

4.6 Cancelling Checkout

If you change your mind partway through, click Cancel at the bottom of the checkout window. This closes the window and returns you to browsing, leaving your cart exactly as it was.

5. Tracking Your Orders

Once you've placed at least one order, AgroCart keeps a running history so you can check on deliveries without digging through old emails.

5.1 Viewing Your Order History

Click My Orders in the sidebar, under the Marketplace heading. Each past order appears as a card showing:

- **Order ID** — a unique reference number for that order.
- **Items included** — the names of every product in that order.
- **Status** — for example, In Transit, so you know where things stand.
- **Total amount** paid for that order.

If you haven't placed any orders yet, this page will simply invite you to browse the marketplace and get started.

5.2 What Happens After You Order

Newly placed orders are automatically picked up by AgroCart's logistics tracking, which you can see in more detail in the Smart Logistics section described later in this manual. There's nothing further you need to do; the platform handles farm notification and shipment tracking on your behalf.

6. The Farmer Hub: Selling on AgroCart

If you grow or produce food, the Farmer Hub is your home base on AgroCart. From here you can list new products for sale, manage what you already have listed, keep an eye on your farm's performance, and explore federal grant programs that can support your business.

6.1 Opening the Farmer Hub

Click Farmer Hub in the sidebar, under the Producer heading. You'll land on a welcome banner summarising three quick facts about selling on AgroCart: a maximum FMPP grant of up to \$500,000, zero commission charged on your sales, and an average payout time of 48 hours.

Below the banner, three tabs let you move between the different parts of the Farmer Hub: List Produce, My Listings, and Grants.

6.2 Listing a New Product

This is where you put a product up for sale on the marketplace.

1. From the Farmer Hub, make sure the List Produce tab is selected (it's the default tab).
2. Fill in the New Produce Listing form on the left of the page using the field guide below.
3. Tap the  Certified Organic switch if the product is certified organic. It will turn on (highlighted) when active; tap it again to turn it off.
4. Click List to Marketplace at the bottom of the form.

A confirmation message will appear, and your new product becomes instantly visible to every buyer browsing the marketplace, your wishlist, search results, and filters.

Field	What to enter
Product Name	What you're selling, written the way a buyer would search for it (for example, "Heirloom Tomatoes").
Farm Name	Pre-filled with your farm's name. Change it if you're listing on behalf of a different farm or co-op.
Price (\$)	The price per unit, in dollars (for example, 4.50).
Unit	The unit your price is based on, such as lb, bunch, jar, or dozen.
Quantity	How many units you currently have available to sell.
Region	Choose the state where the product was grown, from CA, NY, TX, FL, or WA.
Certified Organic	Toggle this on only if the product carries USDA organic certification.
Product Image URL	Optional. Paste a web link to a photo of your product. If left blank, a placeholder farm image is used instead.
Note: Product Name and a valid Price greater than zero are required. AgroCart will let you know if either is missing or invalid before the listing can be submitted.	

6.3 Managing Your Listings

To review or remove products you've already listed:

1. From the Farmer Hub, click the My Listings tab.
2. A table shows every active listing under your farm name, including price, remaining stock, and whether it's marked organic.
3. To take a product off the marketplace, click Remove next to that listing. It will disappear from the table and from the marketplace immediately.

This tab also includes a Sales This Month chart, giving you a quick visual read on how your weekly sales have been trending.

6.4 The Farm Dashboard

Alongside the listing form on the List Produce tab, you'll find a Farm Dashboard card with a few useful indicators:

- **Monthly Revenue** — your earnings so far this month, shown with a progress bar against a typical monthly target.
- **FMPP Grant Utilization** — how much of your available federal grant funding you've used.
- **Inventory Health** — a general read on whether your stock levels look healthy.

- **Available Grant Balance** — the dollar amount you still have available under your current FMPP grant, along with its expiry date.

Status badges underneath the dashboard also confirm your USDA verification and organic certification status, along with a reminder if your certification is coming up for renewal.

6.5 Exploring Grants

Click the Grants tab to browse federal funding programs that AgroCart highlights for its farmers. Each program is shown as its own card with a short description, the maximum funding available, and its current application status.

Programs featured here include the Farmers Market Promotion Program (FMPP), the Local Food Promotion Program (LFPP), the Organic Certification Cost Share program, and the Value-Added Producer Grant (VAPG). At the bottom of the page, AgroCart also offers to connect you with a USDA-accredited grant advisor for a free consultation.

Tip: Most farmers using AgroCart qualify for at least two of these programs at once. If you're not sure where to start, the free consultation mentioned at the bottom of the Grants tab is a good first step.

7. Institutional Procurement (LFPP)

This section of AgroCart is built for buyers placing large, recurring orders on behalf of an organisation, such as a school district, hospital, university, corporate cafeteria, or food bank. Institutional contracts placed here automatically qualify for a 15% Local Food Promotion Program (LFPP) subsidy, lowering the price compared to ordering through the regular marketplace.

7.1 Opening the Institutional Section

Click Institutional / LFPP in the sidebar, under the Producer heading. The page opens with an overview banner and three tabs: New Contract, Active Contracts, and Suppliers.

7.2 Placing a Bulk Contract

To set up a new recurring or one-time bulk order:

1. Make sure the New Contract tab is selected.
2. Fill in the Place Bulk Contract form using the field guide below.
3. Click Submit Contract Request.

Field	What to enter
Select Product	Choose the item you'd like to order in bulk from the dropdown, which lists every product currently available on the marketplace along with its price and stock.
Quantity	Enter how many units you need for this contract.
Institution Name	Pre-filled with an example institution; replace it with your organisation's name.
Institution Type	Choose the option that best matches your organisation: K-12 School District, University / College, Hospital / Healthcare, Corporate Cafeteria, or Food Bank / Nonprofit.
Delivery Frequency	Choose how often you'd like deliveries: Weekly, Bi-weekly, Monthly, or One-time.

Once submitted, AgroCart automatically applies the 15% LFPP subsidy to your contract price and confirms the total savings in a brief confirmation message.

Note: A contract can only be placed if there's enough stock available for the quantity you've requested. If there isn't, AgroCart will let you know so you can adjust the quantity or choose a different product.

7.3 Using the Savings Estimator

Next to the contract form, the Savings Estimator card shows a worked example of how the LFPP subsidy reduces cost on a typical one-year contract, breaking down the market price, the subsidy amount, and your final cost. Underneath, a short list explains the additional benefits institutional partners receive, including farm-to-institution traceability, USDA organic and GAP

certifications, cold-chain logistics, Net-30 invoicing terms, a dedicated procurement manager, and nutrition and allergen reporting.

7.4 Reviewing Active Contracts

Click the Active Contracts tab to see every bulk contract you've placed. Each one is listed with the institution name, contract type, product, quantity, delivery frequency, total cost, the amount saved through LFPP, and a status badge confirming it's active.

If you haven't placed any contracts yet, this tab will simply invite you to submit your first bulk order from the New Contract tab.

7.5 Browsing the Supplier Network

Click the Suppliers tab to see AgroCart's approved network of farms available for institutional sourcing. Every supplier listed here is USDA-verified, carries GAP certification, and participates in the LFPP offset program. Each entry shows the farm's name, region, certification details, product specialty, and star rating, so you can get a feel for who you might be working with before placing a contract.

8. Analytics

The Analytics section gives you a bird's-eye view of how AgroCart is performing as a whole, useful if you want to understand the platform's reach and impact rather than just your own activity.

8.1 Opening Analytics

Click Analytics in the sidebar, under the Intelligence heading.

8.2 Reading the Headline Numbers

Near the top of the page, a row of metric cards summarises platform-wide figures, including total Gross Merchandise Value (GMV), the number of active farmers, the number of participating institutions, the percentage of revenue going directly to farmers, pounds of food waste prevented, and total farm revenue generated. Each card also shows how that figure has changed over time.

8.3 Exploring the Charts

Below the headline numbers, a set of charts breaks the data down visually:

- **Farmer Income Share** — how the percentage of revenue going to farmers has grown year over year.
- **Food Waste Diverted** — pounds of food saved from going to waste, by year.
- **Platform Revenue** — cumulative revenue flowing through AgroCart over time.
- **Logistics Deliveries per Quarter** — how delivery volume has scaled.
- **Regional GMV by State** — which states are generating the most marketplace activity.

These charts update automatically and don't require any input from you; simply scroll through to get a sense of overall platform trends.

9. Smart Logistics

Smart Logistics gives you visibility into how orders move from farm to buyer, including live shipment tracking and cold-chain monitoring for perishable goods.

9.1 Opening Smart Logistics

Click Smart Logistics in the sidebar, under the Intelligence heading.

9.2 Understanding the Overview

At the top of the page, a live route map area shows how many shipments are currently active. Underneath, four quick-glance figures summarise current performance: the number of active shipments, the on-time delivery rate, the average cold-chain temperature across all refrigerated shipments, and the average cost per pound delivered.

9.3 Reviewing Active Shipments

The Active Shipments list shows each shipment currently in progress, including the farm and destination, what's being shipped and how much, the current cold-chain temperature where relevant, a progress bar showing how far along the delivery is, and the estimated time remaining until arrival.

Any order you place through checkout will automatically appear in this list once it's been processed, so you can track your own delivery alongside everyone else's.

9.4 Exporting a Report

Click Export Report in the top right corner of the page if you'd like to download the current logistics data for your own records.

10. Impact Report

The Impact Report tells the bigger story behind AgroCart: how the platform is affecting farmers' livelihoods, local food systems, and the environment.

10.1 Opening the Impact Report

Click Impact Report in the sidebar, under the Intelligence heading.

10.2 Reading the Impact Figures

A grid of impact cards summarises key outcomes, including the number of farmer families supported, pounds of food waste prevented, the share of revenue going to farmers, the number of institutions served, organic acreage supported, and the reduction in carbon emissions compared to a traditional wholesale supply chain. The page also references several United Nations Sustainable Development Goals that AgroCart's work contributes to, including Zero Hunger, Decent Work, Responsible Consumption, and Life on Land.

10.3 Reading What People Are Saying

Scroll down to find a handful of testimonials from real categories of AgroCart users, including farmers describing how their margins have improved and a school nutrition director explaining how LFPP contracts have helped her district's budget and food quality.

10.4 Viewing Year-over-Year Growth

At the bottom of the page, a chart plots the growth of farmers, institutions, and waste prevention together over time, giving you a single visual summary of the platform's progress.

11. Using the AI Assistant (AgroBot)

AgroBot is AgroCart's built-in chat assistant, designed to answer common questions about grants, organic certification, pricing trends, cold-chain logistics, and institutional procurement, all without needing to leave the app or search elsewhere.

11.1 Opening the AI Assistant

Click AI Assistant in the sidebar, under the Intelligence heading. AgroBot will greet you with a short welcome message and a few suggested topics to get the conversation started.

11.2 Asking a Question

You can ask AgroBot a question in two ways:

1. Click one of the suggestion buttons underneath the chat window, such as “FMPP grant eligibility” or “Cold-chain logistics tips,” to send that question instantly.
2. Or, type your own question into the message box at the bottom of the screen and either press Enter or click the send button (the paper plane icon).

AgroBot will reply within the chat window, usually in well under a second. Conversations stay visible on screen as you go, so you can scroll back up to revisit earlier answers.

11.3 What AgroBot Can Help With

AgroBot is especially useful for quick, practical questions in the following areas:

- **Grants** — eligibility and deadlines for FMPP and LFPP funding.
- **Organic certification** — what's involved, how long it takes, and available cost-share support.
- **Pricing trends** — current average prices for popular products and how AgroCart's pricing compares to wholesale.
- **Cold-chain logistics** — best practices for shipping perishable produce safely.
- **Institutional contracts** — how LFPP offsets work for schools, hospitals, and other large buyers.

If your question doesn't clearly match one of these areas, AgroBot will let you know what it specialises in and invite you to ask about one of those topics instead.

12. Quick Reference

12.1 Where to Find Everything

Field	What to enter
Buy produce	Sidebar → Browse Produce
Save items for later	Sidebar → Wishlist

Field	What to enter
Review or adjust your basket	Cart panel at the bottom of the sidebar
Pay for your order	Cart panel → Secure Checkout
Track past orders	Sidebar → My Orders
List your produce for sale	Sidebar → Farmer Hub → List Produce
Manage your existing listings	Sidebar → Farmer Hub → My Listings
Explore USDA grant programs	Sidebar → Farmer Hub → Grants
Place a bulk institutional order	Sidebar → Institutional / LFPP → New Contract
Review institutional contracts	Sidebar → Institutional / LFPP → Active Contracts
View platform-wide statistics	Sidebar → Analytics
Track live shipments	Sidebar → Smart Logistics
See AgroCart's broader impact	Sidebar → Impact Report
Ask a quick question	Sidebar → AI Assistant
Switch between light and dark themes	Theme toggle at the top of the sidebar

12.2 Frequently Asked Questions

Do I need to create an account before I can browse products? No. You can browse the full marketplace, use filters, and explore Quick View without signing in. You'll only need to provide your name and email at the checkout step to complete a purchase.

Can I be both a buyer and a farmer on the same account? Yes. The Farmer Hub and the regular Marketplace both live in the same sidebar, so you can shop and manage your own listings without switching accounts.

What does the LFPP subsidy actually do? It automatically reduces the price of institutional bulk contracts by 15 percent, with the difference covered through the federal Local Food Promotion Program. You'll see this reflected directly in the Savings Estimator and in your final contract total.

Why can't I complete a bulk contract or add more of an item to my cart? AgroCart checks live stock levels before confirming any order. If a product doesn't have enough units left to cover

your requested quantity, you'll see a message asking you to lower the quantity or choose a different product.

Where do I see whether my certification is about to expire? Check the Farm Dashboard on the List Produce tab inside the Farmer Hub. A status badge there will flag if your organic certification renewal is coming up soon.

This manual covers AgroCart as currently published at www.agrichaincart.com/marketplace/agrichain-app/. Since AgroChain Cart, LLC periodically updates the platform with new features, some screens may evolve over time. If you run into something that doesn't match this guide, the AI Assistant inside the app is a good first stop for help.
